**SECTION 5: FIRE-FIGHTING MEASURES**

**Suitable Extinguishing Media:** Use dry chemical, foam or carbon dioxide to extinguish fire.

**Specific Hazards Arising from the Chemical:** Dangerous when exposed to heat or flame. Will form flammable or explosive mixtures with air at room temperature. Irritating or toxic substances may be emitted upon thermal decomposition. Thermal decomposition products may include oxides of carbon and nitrogen. Vapor or gas may spread to distant ignition sources and flash back. Vapors or gas may accumulate in low areas. Runoff to sewer may cause fire or explosion hazard. Containers may explode in heat of fire. Containers may explode in heat of fire. Vapors may concentrate in confined areas. Liquid will float and may reignite on the surface of water.

**Special Protective Action for Firefighters:** Water should be used to cool fire-exposed containers, structures and to protect personnel. Use water to dilute spills and flush them away from sources of ignition. Do not flush down sewers or other drainage systems. Exposed firefighters must wear NIOSH approved positive pressure self-contained breathing apparatus with full face mask and full protective clothing.

**SECTION 6: ACCIDENTAL RELEASE MEASURES**

**Personal Precautions:** Use personal protective equipment.  
Keep people away from and upwind of spill/leak.  
Material can create slippery conditions.

**Environmental Precautions:** Keep spills and cleaning runoff out of municipal sewers and open bodies of water.

**Methods of Cleaning Up:** Contain spills immediately with inert materials (e.g. sand, earth).  
Transfer liquids and solid diking material to separate suitable containers for recovery or disposal.

**SECTION 7: HANDLING AND STORAGE**
